

MERCHANT DASHBOARD

1. Dashboard

2. order list

3. Accounts

4. Connect to asquare

5. Notification

6. Settings

1. Dashboard

- Already explained, and I hope you don't have any doubt in this table

2. Order list

- It should be displayed with calendar default
- This calendar is to show the whole histories of order on that particular date as per the selected date.
- If user click any of the date then the page should show the total lists of orders, and here user can view or print the any order he wishes like which is available in first dashboard page

3. Accounts

- This page also displays the calendar by default
- Here it is dedicatedly allotted for the accounts purpose, so the user should not be confused
- Here we use color code for highlights the transaction status of the respective date
- Color code
 - Green - Amount transacted successfully
 - Blue - Waiting (Delay due to any festivals or government holidays or due to any issue from our side)
 - Orange - On the current date (Example, if user sees the calendar on 13th October then that same date should be in orange)
 - Red - Not transacted the amount.

4. Connect to asquare

- Here we allowing the user to contact us.
- So, it should contain 2 options (1. Dropdown, 2. Message box)
- Initially user can select the dropdown list with any none query and comes to message box he can type there whatever he wants and can send that message to us by clicking the connect button
- Dropdown list-

- Issue in software
 - Issue in CRM
 - Issue in transaction
 - Issue in Products
 - Add new product
 - Pause a product
 - Delete a product
 - Want assistant
 - Others
- User select the option, type the message and send the message to us

5. Notifications

- Same as Facebook notification it should list all the notifications
- Notification from our side

6. Settings

- Leave this table empty
